CERTIFIED DIGITAL COMMUNICATIONS

Certified SMS and certified email channels give legal validity to any type of communication sent to a third party through these channels.

This communication is reflected in a legally certified document that works as reliable evidence before a legal court. This document reflects the

content sent, who sends / receives it, and the moment in which the communication occurs.

Certified digital communication is inexpensive, immediate, automatable and very easy to carry out, which is a revolution over traditional certification systems

CERTIFIED EMAIL

This digital certification channel allows you to send certified communications through your email account and with your current email service.

A certified email is sent as a traditional email that is sent to the recipient with whom you want to certify the communication and in copy a certification email address, this certification email address verifies that this communication has occurred by generating a certified document.

Features:

- ☑ It does not require installing anything, or using any platform, send certified communications as you send an email.
- ☑ Use your personal or private company email address.
- ☑ Send emails to multiple recipients in the same shipment. One certificate per recipient will be generated.
- ☑ It allows attaching documents of up to 5Mb, which will be certified along with the content of the email.

HOW DO I SEND A CERTIFIED EMAIL?

Sending a Certified Email is as simple as sending your emails as it traditionally does, but including a copy (cc) to the email address:

Correo@afilnet.electronico.com

Our email address

Correo@afilnet.electronico.com will read the email sent, it will process it and generate a valid certificate that you can download in PDF and use as reliable proof that the communication has occurred.

This service is compatible with all mail services, such as, Gmail, Outlook, thunderbird, company emails, etc.

CERTIFIED SMS

The SMS is the digital channel with the highest open rate, in this case, the operator certifies that this SMS has been sent and its content.

A certified SMS is like a conventional text message certified by a third party where it is reflected that this message was sent on a specific day and time to the indicated recipient.

Features:

- Delivery status report.
- Send Bulk certified SMS in a personalized way.
- Automated, connect Certified SMS with your business processes quickly and easily using our API.

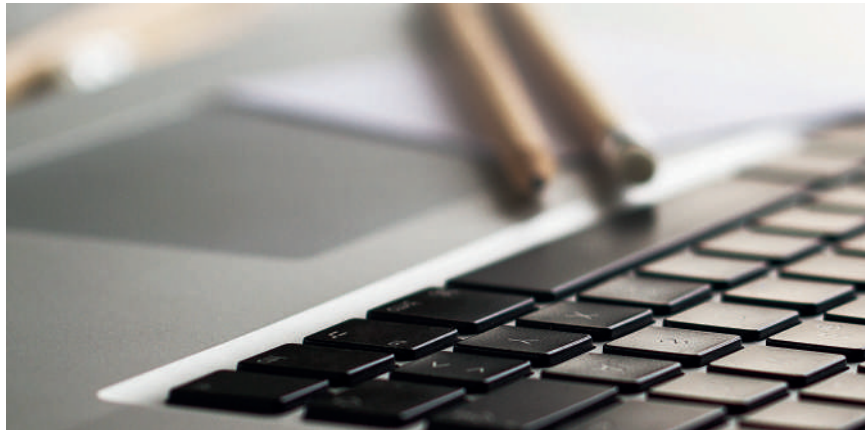

HOW DO I SEND A CERTIFIED SMS?

From the Afilnet platform you can send Certified SMS similar to a classic sms. Just indicate the recipient and the content of the SMS.

This SMS will be processed through a telephone operator that allows the certification of the content and the destination to which it has been sent.

This operator will generate a valid PDF certificate that can be used as reliable proof that the communication has occurred.

www.afilnet.com

HOW IS THE GENERATED CERTIFIED DOCUMENT?

When the communication occurs, a signed PDF document is generated by a certifying authority, which certifies the content, date / time, origin and destination of the communication.

All the communications produced are registered and you can find them in your Afilnet account, where you can download the certificate

ADVANTAGES OF USING CERTIFIED CHANNELS

The certificate includes the following information:

- ✓ Unique identifier of the certificate
- ✓ Origin of the email
- ✓ Recipient of the email
- ✓ Sent and delivery time
- ✓ Subject
- ✓ Attachments (including full content)

Electronic communication certificate Certified Email

Certificate identifier: EXXXXXXXX-S

Details

Name / Username of the user: AFILNET

Sender: UserTest CERTIFIED EMAIL <425302@afilnet.electronico.com> (originated by User <origin@test.com>)

Destination: destination@test.com

date and time: July 31, 2020 (20:35 GMT +2)

Delivery date and time: July 31, 2020 (20:35 GMT +2)

Subject: Certified email Test

Message:

"Lorem Ipsum" is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

Attachments:

File	File name	
	Content0-text-.html	See attached file.
	Content1-application-file-example_PDF_500_kB.pdf	See attached file. Visible in documents.

This certificate has been generated at the request and with the express consent of the interested party, through a secure and confidential system. This certificate has been assigned a unique identifier in the records of the signing operator.

Cheap, the cost of certified communications is cheaper than the burofax or registered letter.

Fast, sending certified communications is now faster than ever. Just write your message, attach your files and send them.

Automated, the certificate service is fully configurable with your company's software.

Simple to use, sending email and certified sms is as simple as doing it with classic channels.

Without having to install anything, both channels can be used from your own browser or current mail service.

Environmentally friendly, traditional certification methods require the use of paper, certified digital communications avoid the use of paper.
